

You're Invited to an Experience Stratasys Open House

Spend a few hours or the full-day day immersing yourself in what is happening now in with additive manufacturing in medical, architecture, engineering and design.

In a world where innovation saves lives, builds efficiencies and changes the world around us 3D printing is empowering engineers, manufacturers, architects and medical professionals to work faster, test more thoroughly and personalize like never before.

Do you know what industry is doing in the fields of medicine, engineering, art and architecture?

Is your academic program preparing students to thrive this fast-paced, tech driven economy?

Technical Training Aids and Prototyping Solutions invites you to the:

2018 Stratasys Solutions Florida Seminars & Open Houses,

to hear industry experts talk 3D printing applications and learn how universities are integrating real-world AM tools into their programs.

View Agenda or Register Now at: <https://ttaweb.com/event/fl-wksp>

**Registration is free but seating is limited. Pre-register early to reserve a seat & secure your lunch!*

DATES & LOCATIONS

When: Wednesday, March 21st at 9am

Where: The University of Miami

Shalala Student Center

Activities North & South Rooms

When: Thursday, March 22nd at 9am

Where: The University of Central Florida

The Institute for Simulation and Training

Partnership III Building - Room 232
